Dear Alair Homes hiring team,

I am applying for the remote Digital Marketing Manager role (internally Digital Experience Manager; CAD \$80 to \$100k). Your brief is clear: help independently owned builders become the trusted names in their markets through local visibility, WordPress site systems, Google Business Profiles, and search/AI discoverability that people and machines can both read. That matches how I already work for local businesses.

At Lumin Marketing Group I own delivery for 2 active SMB client accounts. Day to day that means keyword and intent research, Google Business Profile and local SEO systems, technical and on-page work, WordPress/Wix/Shopify updates, and GA4 plus Google Search Console reporting turned into prioritized next steps. At Phantom Avenue Tattoo Shop I raised organic traffic about 30% and built the local SEO and site foundation. I use Claude and Claude Code to build playbooks and speed research or first drafts, then edit with human review before anything publishes.

How I would support Alair's authority, access, and affinity work:

- Strengthen local SEO and Google Business Profile systems so builders show up in market searches and AI answers
- Keep alairhomes.com and location-page structure clear, fast, and maintainable on WordPress
- Translate GA4 and Search Console into playbooks local teams can reuse instead of rebuilding each market
- Use AI tools where they genuinely save time, with human judgment on what ships

Honest gaps: day-to-day ownership of a 100+ location franchise CMS at Alair's scale, and deep HubSpot or schema markup builds, are still growing versus my strongest local SEO, WordPress, and AI-assisted delivery for SMB accounts. I learn systems fast and would ramp those with your brand and marketing team. Resume attached. Happy to walk a sample local-visibility or location-page recommendation on a call.

Best regards,

Dylan Michael
