Dear Hiring Manager,

I am applying for the Web Optimization Lead role at BIS Safety Software in Sherwood Park. I live in south Edmonton and can work on-site. At Lumin Marketing Group I own website performance and SEO for 2 active SMB client accounts: WordPress structure and content, technical hygiene in Search Console, landing-page conversion fixes, and reporting that turns into a clear next sprint.

How I would support BIS web performance:

- Grow organic and AI-search visibility with keyword research, technical SEO, and AEO/GEO-aware page structure
- Improve lead capture on marketing-site landing pages, including alignment with paid media traffic
- Keep WordPress quality high: broken CTAs, content errors, mobile UX, and brand-consistent templates
- Use Claude and Claude Code for research and drafting, with human review before anything publishes

I am honest that leading a multi-person web bench and deep proprietary eCommerce checkout ownership are still growing compared with a dedicated in-house web lead. What transfers is ownership of site health, SEO results (including a prior 30% organic traffic lift at Phantom Avenue), and paced quality review before publish. I am targeting base pay at or above CAD \$60,000. Resume attached; happy to walk through a sample web roadmap.

Best regards,

Dylan Michael
