Dear Hiring Manager,

I am applying for the Remote SEO Strategist role at Brafton (Canada). I am based in Edmonton and available fully remote. At Lumin Marketing Group I own SEO delivery for 2 active SMB client accounts: competitive research, on-page and technical basics, prioritized recommendations, and GA4 / Google Search Console reporting written so non-SEO stakeholders know what to do next.

How I would support Brafton consulting work:

- Build clear audits and opportunity lists from crawl and SERP findings (SEMrush / Search Atlas today; open to MarketMuse, Screaming Frog, and related tools)
- Ship on-page and structure recommendations clients can approve and implement
- Write client-ready reports and decks that keep technical SEO readable
- Use Claude and Claude Code for research and drafting, with human review before anything goes to a client

I am honest that most of my SEO ownership has been SMB and local brands rather than large e-commerce programs, and that my HTML/JavaScript depth is practical rather than advanced engineering. What transfers is curiosity, client clarity, and paced delivery. I am targeting base pay at or above CAD \$60,000. Resume attached; happy to share a sample audit outline or reporting walkthrough.

Best regards,

Dylan Michael
