Dear Hiring Manager,

I am applying for the Marketing Automation Delivery Specialist role at Conversion Digital (flexible Canada). At Lumin Marketing Group I own CRM and automation delivery for 2 active SMB client accounts across Go High Level journeys, email/SMS automation, requirements notes, launch checks, and clear status updates. Your mix of solution planning support, QA validation, campaign execution, and delivery coordination matches how I already keep automated customer communications accurate and on time.

How I would support Conversion Digital delivery:

- Help turn discovery notes into clear requirements, workflows, and acceptance checks before build and launch
- Support journey and campaign execution with careful QA, issue logging, and post-launch validation
- Keep delivery docs, templates, and status updates tidy so account and technical partners stay aligned
- Use Claude and Claude Code to speed documentation and test checklists, with human review before anything ships

I am honest that deep Salesforce Marketing Cloud, Adobe Journey Optimizer, Marketo, and Braze enterprise builds are still growing versus my Go High Level and SMB automation stack. What transfers is lifecycle campaign ownership, documentation discipline, stakeholder communication, and a bias toward catching problems before customers see them. Resume attached. Happy to walk through a sample journey QA checklist from requirements through launch.

Best regards,

Dylan Michael
