Dear Digital 6ix hiring team,

Subject line for email: SEO & GEO Specialist. I am applying for the remote contract SEO & GEO Specialist role (CAD \$35 to \$50/hr, 20 to 30 hrs/week). At Lumin Marketing Group I own SEO delivery for 2 active SMB client accounts: audits and fixes, keyword research, on-page structure, WordPress/Wix/Shopify updates, Google Search Console / SEMrush checks, and plain-language client deliverables. Your published audit-first, written-by-default workflow matches how I already ship work.

How I would support Digital 6ix clients:

- Run technical and content audits end to end, then ship the highest-priority fixes instead of stopping at the report
- Improve on-page structure, internal links, and local / service pages so pages are clearer for search and AI answer engines
- Build content briefs from real keyword and intent gaps so a writer can execute without a second meeting
- Track movement in Google Search Console and SEMrush honestly, including when numbers are flat, and turn that into a client-ready note
- Use Claude and Claude Code to speed audits and first drafts, with human review before anything is sent to a client

Portfolio note (as requested): one concrete win is Phantom Avenue Tattoo Shop, where organic traffic rose about 30% after website launch, on-page SEO, and local SEO (citations + Google Business Profile). What I would change now: tighter Search Console issue logging, clearer before/after windows for each change, and more structured data on key service pages so AI answer engines can quote the business cleanly. Resume attached as optional context. Happy to walk a live page rewrite or audit sample on a paid trial.

Best regards,

Dylan Michael
