Dear Hiring Manager,

I am applying for the Web Strategy Lead role at Fortra (remote Canada, CAD \$65,000--\$80,000). I am based in Edmonton and legally eligible to work in Canada. At Lumin Marketing Group I own SEO and digital strategy for 2 active SMB client accounts: keyword research, on-page and technical SEO basics, WordPress updates, and GA4 / Google Search Console reporting that stakeholders can act on.

How I would support Fortra web growth:

- Execute on-page and technical SEO work: audits, keyword strategy, crawl/indexability basics, internal linking, and page-speed minded fixes
- Partner with paid media so organic and SEM reinforce the same search demand
- Turn GA4 / Search Console and SEMrush findings into clear next actions for product marketing and developers
- Use Claude and Claude Code for research and draft recommendations, with human review before anything publishes

I am honest that enterprise multi-brand site migrations, Looker Studio dashboards at Fortra scale, and deep backlink programs are still growing compared with my current book of two SMB accounts. What transfers is hands-on SEO ownership, SEMrush familiarity, clear reporting, and paced delivery. Resume attached.

Best regards,

Dylan Michael
