Dear Edward,

I am applying for the Remote Digital Marketing Specialist role at Heavy Duty Advertising / K+E Marketing & Consulting. I am based in Edmonton and work Mountain Time. My day-to-day work is SEO execution for service businesses: keyword research, WordPress content and on-page fixes, local SEO, and GA4 / Google Search Console reporting for 2 active SMB accounts at Lumin Marketing Group. Go High Level CRM workflows are part of how I keep follow-ups organized.

What I can own for your clients:

- Build monthly SEO content plans tied to search intent and publish pages in WordPress with solid on-page structure
- Improve titles, metas, headings, internal links, and basic technical SEO (indexation, sitemaps, redirects coordination)
- Support local visibility (Google Business Profile basics, service-page SEO) for repair and service niches
- Track results in GA4 and GSC; use Claude and Claude Code for research/drafting with human review before publish

I am available during Edmonton business hours for a full-time remote contract. Schema (JSON-LD) is an area I can strengthen quickly with validation tooling as part of onboarding. Target monthly rate is open to discussion against your scope and output expectations. Resume attached; happy to share WordPress SEO page examples and references on request.

Best regards,

Dylan Michael
