Dear Hiring Manager,

I am applying for the Paid Advertising Specialist (Ecommerce) role at Power Digital (Remote Canada). At Lumin Marketing Group I own paid and digital delivery for 2 active SMB client accounts across Google Ads, Meta Ads, budget pacing, creative tests, Shopify/WordPress landing context, and GA4 reporting with clear next actions. Your mix of flawless platform execution, autonomous pacing, testing roadmaps, and AI-assisted ops is a strong fit for how I already work.

How I would support Power Digital paid advertising:

- Keep Meta and Google campaigns accurate: builds, naming, tracking checks, launches, and paced spend without waiting for reminders
- Optimize week to week with test hypotheses, creative swaps, and plain-language recaps that connect performance to client goals
- Pair ads with coherent landing and product-page context on Shopify or WordPress so spend is not wasted on broken journeys
- Use Claude and Claude Code to speed research, QA checklists, and reporting templates, with human review before anything publishes

I am honest that large multi-brand ecommerce direct-response books, TikTok/Pinterest depth, and Power Digital's Nova/Iris tooling are still growing versus my current two SMB accounts. What transfers is Google Ads Certified execution, Meta campaign ownership, reliable client communication, and comfort using AI to move faster without skipping judgment. Resume attached. Happy to walk through a sample test roadmap for a Shopify acquisition account.

Best regards,

Dylan Michael
