Dear Hiring Manager,

I am applying for the Lifecycle Marketing Specialist role at Practice Better (remote Canada). At Lumin Marketing Group I own CRM and follow-up delivery for 2 active SMB client accounts across Go High Level journeys, email/SMS automation, segmentation, launch checks, and clear performance notes. Your focus on behaviour-triggered campaigns that help practitioners adopt the right integrations matches how I already keep automated customer communications accurate, timely, and tied to real signals.

How I would support Practice Better lifecycle work:

- Build and QA segmented email journeys tied to onboarding, plan, and engagement signals so the right message ships at the right moment
- Keep campaign docs, partner co-marketing notes, and status updates tidy so Lifecycle, CX, and Product stay aligned
- Report attach, engagement, and expansion trends in plain language with a clear next test
- Use Claude and Claude Code to speed drafts and checklists, with human review before anything goes live

I am honest that HubSpot and Pendo depth are still growing versus my Go High Level and SMB automation stack, and that my buyers have been local SMBs rather than B2B SaaS practitioners. What transfers is campaign execution, trigger-based follow-ups, documentation discipline, and a bias toward catching problems before customers see them. Base range of CAD \$60,000-\$70,000 works for me. Resume attached. Happy to walk through a sample behaviour-triggered journey from signal to launch check.

Best regards,

Dylan Michael
