Dear Studiothink hiring team,

I am applying for the remote Website Strategist role (CAD \$65 to \$80k). I read your site and the "Be a Brand Rebel" brief: you want someone who digs into analytics and search behaviour, then turns that into a clear website direction clients and builders can act on. That matches how I already work.

At Lumin Marketing Group I own delivery for 2 active SMB client accounts. Day to day that means keyword and intent research, technical and on-page SEO, WordPress/Wix/Shopify updates, GA4 and Google Search Console checks, and plain-language recommendations I can defend in a client meeting. At Phantom Avenue Tattoo Shop I built and launched the site and raised organic traffic about 30% through SEO and content structure. I use Claude and Claude Code to speed audits and first drafts, then edit with human review before anything goes to a client.

How I would support Studiothink website work:

- Turn GA4 and Search Console behaviour into prioritized site fixes, not vanity reports
- Shape information architecture and page briefs so SEO, GEO/AEO, and conversion goals stay aligned
- Keep launch and monthly website checklists tight across multiple accounts
- Use AI tools to accelerate research and drafts without skipping human judgment

Honest gaps: deep day-to-day Figma wireframing and heavy schema markup builds are still growing versus my strongest SEO, CMS, and analytics delivery. I learn systems fast and would ramp those with your team. Resume attached. Happy to walk a sample site critique or IA recommendation on a call.

Best regards,

Dylan Michael
