Dear Hiring Manager,

I am applying for the PPC & Social Media Ads Manager role posted through Talent Advantage for your Edmonton digital marketing client (\$60,000--\$70,000, downtown on-site). I live in Edmonton and can work on-site. Day to day I plan and run Google Ads and Meta campaigns for SMB clients at Lumin Marketing Group: budgets, creative tests, performance reporting, and clear next actions. I am Google Ads Certified and comfortable in Meta Business Manager and GA4.

What I can own for your client accounts:

- Build and optimize Google Search, Display, and related paid campaigns with clean tracking and reporting
- Run Meta paid social tests (audiences, creative, offers) and document what to scale or cut
- Manage budgets across a small portfolio and keep clients updated in plain language
- Use Claude and Claude Code for research and first-draft ad copy or reports, with human review before anything goes live

I am honest that my paid-media years are still growing versus a large multi-platform agency book, but I ship campaigns end to end, hold myself to certification standards, and learn platforms quickly. Resume attached. Happy to walk through a recent Google Ads or Meta test and the reporting I used.

Best regards,

Dylan Michael
